

Faizan Abid

Software Engineer - Full Stack Developer

WORK EXPERIENCE

Cielo Costa, Oakham, United Kingdom — Software Engineer

April 2022 - Present

- Deliver high-quality, robust production code for multiple client projects.
- Collaborate with technical directors to lead the development and architecture of technical solutions to fulfil business requirements.
- Build and support SharePoint Framework (SPFx) solutions with ReactJS for SharePoint Online.
- Architect intuitive apps using MERN Stack, NextJS, SharePoint and MS Teams integration, enhancing productivity and collaboration for clients.
- Introduced a streamlined pathway for quick deployment of SPFx projects, resulting in a 2-hour reduction in work for each deployment cycle.
- Manage CI/CD processes using Azure Pipelines, ensuring timely and efficient delivery.

Pairing OÜ, Tallinn, Estonia — Software Engineer

June 2021 - March 2022

- Successfully worked on large codebases, including a multi-million euro revenue InsurTech app.
- Built new, high-performance client-side features using VueJS.
- Experienced in working in a testing-oriented and CI/CD environment, ensuring high-quality and reliable software using Jest and Cypress.
- Enhanced my expertise by collaborating with 15-year industry veterans.
- Demonstrated expertise in troubleshooting and upgrading software, resulting in high-end solutions for clients, delivering results that exceed expectations.

Zagop, Karachi, Pakistan — Software Engineer

February 2020 - June 2021

- Improved and scaled significant features of the Client's web apps and services.
- Implemented video streaming components using FFmpeg in Laravel.
- Proposed and developed a map drawing component using ReactJS and NodeJS.
- Contributed to large-scale real estate projects, involving more than 50K properties, and optimized the search query by 100%.
- Led a team of 3 developers to deliver a high-performing video platform.

Proleadsoft, Karachi, Pakistan — Junior Software Engineer

July 2019 - February 2020

- Developed, maintained, and shipped production code for client websites primarily using ReactJS, NodeJS, Laravel, CSS, Sass and JavaScript.
